## Nouveau series A New Bed Head Unit

# Nouveau-G Series

## Design and Comfort

- Special housing designed to provide smooth lines of its overhead strip.
- Easy access to electrical sockets fixed on a sloping panel well fitting easily accessible plugs.
- Completely integrated efficient lighting designed to maximize reflection without dazzle.
- Finished in white epoxy paint (superior quality powder coating RAL 9016)

## Flexibility and Maintenance

- The electrical, medical gases and lighting equipment are completely modular which gives the ability to extend or replace the services without tooling the cover
- Easy lighting maintenance by allowing for and quick removal of batters.
- Total access to various medical gases outlets and feeding tubes without disconnecting the electrical network (EN793 Norm).

## Hygiene and Safety

- Smooth surface avoiding any accumulation of dust and germs for a better asepsis.
- Flat and smooth strip lighting top allowing a safe and an easy cleaning.
- Total separation of oxygen and electrical compartments.
- Efficient and invisible ventilation of the medical oxygen section. Each product in conformity with standard.

# Nouveau-R Series

Whatever your requirements-ward, Recovery CCU, ICU, NICU-Nouveau R series Bed Head Unit is designed to meet each area's necessity, with the required level of service. You specify the needs of the care deliver and the location of services and medical equipment.

MODEL : NOUVEAU-R Series

A major advantage of Nouveau Series Bed Head Unit is the option of adding a rail section of sections into the trunking profile. The 10mm x 30mm rail is designed to satisfy a new European standard and will take most clamps currently on the market.

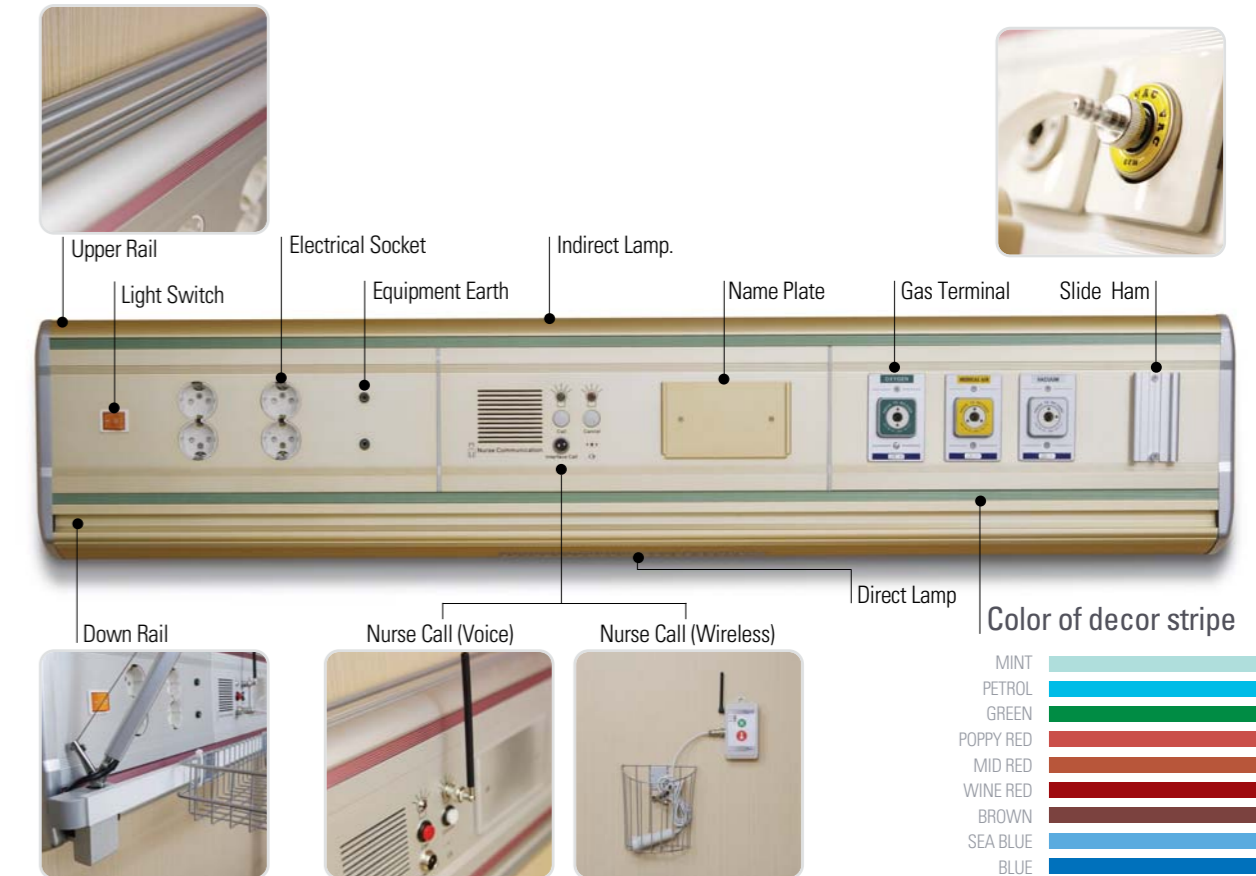

With the option of the integral medical rail, designed to meet the new European standard, you can organize, control and locate life support devices exactly where needed - and change them as the patient's condition changes. Medical equipment just where you want it.

*An elegant modular solution for delivering services and managing equipment in all Patient Care Environments*

**The Finishing Touch...**  
A choice of plain or various different colors of decor stripe

## Adaptability & Flexibility

MMA sells its products throughout the world and is used to the different market needs. Nouveau Series Bed Head Unit has the flexibility to be supplied with Gem 10 for HTM 2022 markets and other terminal units - British, German, Ohmeda, Japanese, etc - can be fitted as an option. UK sockets, US hospital grade sockets or any other electrical socket can all be accommodated. We can provide provision for nurse call, monitoring, data sockets, telephone sockets etc.

## Architectural Service Units (Modular Head Walls)
